

hello my name is george c mullins my amateur call sign is kc8qww i am a technician i support the national conference of volunteer examiner coordinator on there petitions RM-10870 and RM-10787 to altogether eliminate the morse code testing requirement because it is a slow way to talk to another station when you use morse code it occupies more of the radio spectrum ssb occupies less spectrum then morse code does so i ask the fcc to reduce the number of bands that you can use morse code on the 30 meter has all morse code on it and take the morse code of the other hf bands that would give ssb more radio spectrum the hf bands would not be crowded i know that a person who life is in danger would not use morse code to get help he would use ssb to get help that is the best way and a lot of people has got amateur radio receivers and they listen to it but if a person would send out morse code they could not get on the telephone to call 911 for help because they could not understand him by morse code but they could when he talk on ssb hf radio i ask the fcc do away with morse code thank you.
